# **Economic Overview And Outlook: Oregon**

#### Jobs

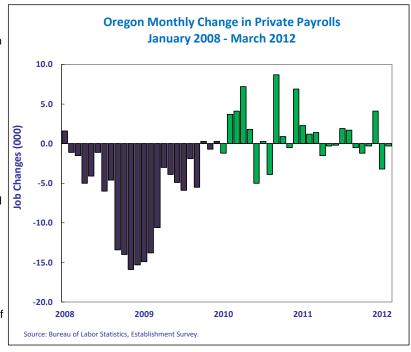

- Including March, the private sector has gained jobs nationwide for 25 consecutive months.
- In Oregon, private sector employment fell by 10.4 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 2.8 percent.
- In Oregon, employees in the construction, mining, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Oregon have experienced the greatest employment increases: mining; education and health services; and leisure and hospitality.\*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

### **EMPLOYMENT**

- The unemployment rate in Oregon was 8.6 percent in March 2012, 3.4 percentage points from December 2007, but down from its most recent peak of 11.6 percent in June 2009.
- 172,000 Oregon residents were counted among the unemployed in Oregon during March 2012.
- In Oregon, initial claims for unemployment insurance benefits totaled 34,570 during March, up 8.4 percent from the previous month. Since peaking at 61,646 in March 2009, initial claims for unemployment insurance benefits in Oregon have declined by 43.9 percent.

# EARNINGS

Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 4th quarter of 2011, total personal income is 0.9 percent above its 4th quarter of 2007 level.

Real per capita personal income (in 2005 \$) in Oregon was \$33,286.50 in the 4th quarter of 2011, up from \$32,000.30 in the 4th quarter of 2009.

## Housing

- After peaking in the first quarter of 2007, national home prices declined by 16.6 percent over 17 quarters. Between the second quarter of 2011 and the fourth quarter of 2011, the most recent quarter, national home prices rose by 1.4 percent.
- In Oregon, home prices fell by 23.6 percent over 14 quarters from their peak in the fourth quarter of 2007. Since the second quarter of 2011, home prices in Oregon have risen by 1.9 percent.
- As of the 4th quarter of 2011, 3.6 percent of all mortgages, including 14.5 percent of subprime mortgages, were in foreclosure in Oregon.
- Housing starts in Oregon totaled 7,000 units (seasonally adjusted annual rate) in February 2012, a decrease of 33.8 percent from January.
- Within the West census region, which includes Oregon, sales of new single-family homes totaled 81,000 units in February 2012, an increase of 8.0 percent from January. Sales of existing single-family homes decreased 7.4 percent to 1,000,000 units (at seasonally adjusted annual rates) from February to March 2012.

# How Does Oregon Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Oregon to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Oregon since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Oregon.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.
